September 24, 2019

Senator Mitch McConnell  
Majority Leader  
United States Senate  
317 Russell Senate Office Building  
Washington DC 20510

Senator Chuck Schumer  
Minority Leader  
United States Senate  
322 Hart Senate Office Building  
Washington DC 20510

Dear Leader McConnell and Leader Schumer,

On behalf of the undersigned organizations representing Historically Black Colleges and Universities (HBCUs), Tribal Colleges and Universities (TCUs), Hispanic-Serving Institutions (HSIs), other Minority-Serving Institutions (MSIs), and the higher education community at large, we write to ask that you and the members you lead bring to the floor and vote in favor of the House-passed H.R. 2486, the Fostering Undergraduate Talent by Unlocking Resources for Education (FUTURE) Act, as soon as possible.

This bicameral, bipartisan bill was introduced by Representative Alma Adams (D-NC) and Representative Mark Walker (R-NC), with a companion bill offered in the Senate by Senator Tim Scott (R-SC) and Senator Doug Jones (D-AL), to extend vital mandatory funding for Science, Technology, Engineering, and Mathematics (STEM) education, student completion and infrastructure programs benefiting HBCUs, TCUs, HSIs, and other MSIs in Title III, Part F of the Higher Education Act of 1965 (HEA) before it expires on September 30, 2019.

This legislation recently passed the House of Representatives under suspension and could be quickly enacted following Senate passage. We share the concerns of some senators that the FUTURE Act provides only a temporary extension, and we agree that a permanent extension is needed. The two-year window provided by passage of the FUTURE Act would secure this critical funding stream in the short-term, allowing additional time for Congress to provide a permanent solution, either as a stand-alone measure or as part of the reauthorization of the HEA.

Meeting the September 30 deadline is of vital importance to institutions. The funding provided in Title III, Part F allows institutions to build and maintain capacity in vital areas they would otherwise lack the resources for. It would be irresponsible for a college president to budget for, allocate resources toward, and depend upon federal funding when a clear, statutory deadline has expired without congressional action. As a result, institutions will be forced to begin ending, or severely altering, the programs and efforts these funds support.

This will lead to significant, negative outcomes. According to a recent report, there are more than “20 million young people of color in the United States whose representations in STEM
education pathways and in the STEM workforce [fall] . . . far below their proportions of the general population.”¹ In addition, “the educational outcomes and STEM readiness of students of color will have direct implications on America’s economic growth, national security, and global prosperity.”²

Another report released by the White House’s National Science and Technology Council stated that the “national benefits of a strong STEM foundation cannot be fully realized until all members of society have equitable access to STEM education and [until] there is much broader participation by those historically underserved and underrepresented in STEM fields...”³ The report goes on to highlight the importance of diversity in the workplace leading to more engaged, innovative, and higher-performing organizations.

It is clear that diversifying our STEM workforce should be a priority for our country and would pay immediate dividends to our economy. The FUTURE Act helps avoid a $2.55 billion-dollar cliff in funding over 10 years for HBCUs, TCUs, HSIs, and other MSIs by extending mandatory funding until Fiscal Year 2021. This bill is revenue neutral, fully offset and allows these important institutions to continue the valuable work of offering quality STEM programs.

We thank you for your consideration of this request and look forward to working with you to enact this legislation before the September 30 deadline.

Sincerely,

Ted Mitchell
President
