

President Biden’s Fiscal Year (FY) 2022 Budget Request for CGS Programs of Interest

As of June 1, 2021

On May 28, President Joe Biden released the full [fiscal year \(FY\) 2022 budget proposal](#). If enacted, most federal agencies of interest to CGS and the graduate education community would receive an increase in federal funding, including the Department of Education, the National Science Foundation, and National Institutes of Health, among others. This budget request, which expands on President Biden’s [preliminary budget outline](#) released in April, also includes Biden’s two recent legislative proposals, the American Jobs Plan and the American Families Plan. These proposals would invest in two years of free community college and research and development infrastructure and jobs, among other initiatives. These proposed increases by President Biden are not yet final, and CGS will continue to keep members apprised as the FY22 appropriations process continues. All CGS FY22 appropriations resources are available [here](#).

	FY 2022 President’s Budget Proposed Levels	FY 2021 Enacted Levels
